Stephen James Uy

F R O N T - E N D D E V E L O P E R

Enthusiastic Self-taught Web Developer eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Clear understanding of coding and web development. Motivated to learn, grow and excel in Computer-related field specifically in web development.

- Junior web developer able to build a web presence from the ground up, from concept, navigation, layout and programming to UX design and development.
- Good knowledge of Javascript, as well as version control using Git.
- Fast learner, hard worker and team player who can easily adapt in any array of design patterns, languages and multimedia Web tools

PROJECTS

Made an online game shop web application.

Nov '21 - Dec '21

Creator

purchase online games with product description and reviews.

- gameshop.vercel.app
- Made on top of Next.js react framework with Snipcart API for handling adding of items to the card and user payment method
- populated content by making API calls to a headless cms based on GraphQL
- Used libraries such as react-bootstrap/Accordion and MUI for product design and functionality
- Managed local and remote data by using Apollo Client state management library to connect to or make calls to our headless content management system (Graphcms)
- Used GSAP's timeline and scroll trigger for animations and transitions between pages

Created a website for a cafe shop located in New Jersey, US.

Oct '21 - Nov '21

Freelance

A new cafe offering coffee and other beverages plus sweets.

- littlesips.vercel.app
- Implemented pages to highlight products and company details using React router
- Added Gallery from react-grid module for products carousel display
- Provided a filter option for choosing product type
- Added Google Map API in the location page for cafe location search
- Used GSAP's timeline and scroll trigger for animations and transitions between pages

Made a website for creating recipes.

Aug '21 - Oct '21

Creator

A CRUD react app for personalized recipe creations

- recipecreations.netlify.app
- Created UI for list of data (recipe list) and for editing a specific object by selecting the Id that object
- Populated and synced data using Firebase database platform. CRUD operations are synced as well
- Implemented a user registration, login and logout system by creating a json-server that handles REST services
- Created a search function to filter recipes based on client's recipe name input

Made my first Portfolio

Mar '21 - Jun '21

Creator

A brief introduction of my self and a collection of projects.

- stephenuy.vercel.app
- Created the project using HTML5, CSS3 and JavaScript.
- Relied on HTML DOM's method getBoundingClientRect to get the coordinates of images and texts for scroll animation effects.
- Used emailJs API for linking the contact me section to receive the content to my email address.
- Added sticky navigation method for better accessibility and user experience.
- Deployed using vercel.com

JapanWork.Co.ltd

Mar '20 - Jul '20
